Mission
To provide water supply, sewage and solid waste services, contributing to social, economic and environmental development.

COPASA: Operating Release – June 2012

Belo Horizonte, July 10, 2012 - COPASA MG - Companhia de Saneamento de Minas Gerais (BM&FBOVESPA: CSMG3) hereby announces its results for June 2012.

In June 2012, sanitary sewage concessions were executed in the cities of Conceição do Pará, Matias Cardoso and Presidente Juscelino, whose overall population is approximately 9 thousand inhabitants. Both Conceição do Pará and Matias Cardoso are included in the Company's Expansion Plan, within the group of cities with less than 15 thousand inhabitants where we already had the water supply concession and we intended to obtain sanitary sewage concession as well.

In addition, in June the sewage concession has been signed and the water supply concession has been renewed in the municipality of Catuti, whose population is estimated at 3 thousand inhabitants.

BILLED VOLUME

The upturn in the billed volume recorded in June 2012 in relation to the same month of the previous year was driven by the increase in the number of water and sewage units in the period, as well as by the number of days of higher consumption in June 2012 in relation to June 2011.

Compared to the previous month, the upturn in the billed volume was due to the longer period of consumption recorded in June 2012 versus May 2012.

Operating Highlights[1]

Indicator	unit	Jun/12	Jun/11	May/12	Jun/12 X Jun11	Jun/12 X May/12
NO. OF CONNECTIONS[2]	one	5,880,768	5,576,950	5,852,633	5.45%	0.48%
WATER	one	3,703,192	3,564,710	3,686,768	3.71%	0.45%
SEWAGE	one	2,177,576	2,012,240	2,165,865	8.22%	0.54%

NO. OF CITIES – WATER OPERATION	one	611	605	611	0.99%	0.00%
NO. OF CITIES – SEWAGE OPERATION	one	179	167	179	7.19%	0.00%
CONSUMPTION DAYS[2]	one	31.50	29.80	30.00	5.70%	5.00%

1 – The figures include COPASA MG and COPANOR concessions, subject to possible adjustments.
2 - Definitions:
Connections: connection between the company's network and the client's building.
Units: potential subdivisions of the client's building. Ex: a 10-apartment building has one connection and 10 units.
Consumption days: refer to the number of days between the initial and final measurement for the calculation of the billed consumption. It is worth pointing out that these numbers correspond to the average of COPASA MG operations as a whole, since each location has a different consumption day period.
